

EPOD

Revolutionise the way you service your customers

ePOD from VSc is a powerful Delivery Management System which automates your delivery operation, customer service reporting and billing operations to improve service levels, streamline administration and present indisputable documentation to your customers for timely payments.

With ePOD, stock loss on the road is reduced, errors are cut down and billing is accurate. Customer service levels can also be clearly and easily monitored. Working via a PDA-based Driver Management system, accurate, real-time information is shared between the driver and your appropriate departments, ensuring fast, accurate invoicing and improved customer service.

With functionality that includes

- On screen signature capture
- Image capture
- Individual order scanning
- Automatic reconciliation
- Capturing of damaged stock
- Capturing of returns

Payment disputes are now a thing of the past.
